EDUCATION

Vellore Institute Of Technology, Bhopal

Bachelor of Technology in Computer Science (Specialization in AI & ML)

August 2023 – May 2027

GPA: 8.66

EXPERIENCE

ServiceNow | [Certificate](#)

Virtual Intern

- Completed comprehensive training covering ServiceNow Administration Fundamentals, Agentic AI, Automated Test Framework (ATF), Flows and CSA Exam Preparation.

PROJECTS

Breast Cancer Prediction & Prevention Platform | [GitHub](#)

- Model Optimization:** Implemented and fine-tuned an EfficientNetB3 architecture in TensorFlow to perform high-precision medical image classification.
- Full-Stack Engineering:** Developed a full-stack medical imaging web application using Flask and PostgreSQL, incorporating a dynamic dashboard for comprehensive prediction tracking.
- Data Security:** Engineered a robust user authentication system utilizing SHA-256 cryptographic hashing to strictly safeguard sensitive patient records and account credentials.

Dog Vision: Multi-Class Breed Identification | [GitHub](#)

- Deep Learning Pipeline:** Architected a deep learning pipeline using TensorFlow, Pandas, and NumPy to ingest and process a massive dataset from the Kaggle Dog Breed Identification competition.
- Transfer Learning:** Utilized MobileNetV2 transfer learning to train and test a model capable of differentiating between 120+ unique dog breeds.
- Scale & Performance:** Successfully trained the model on over 10,000 images, optimizing accuracy for fine-grained, multi-class classification tasks.

TECHNICAL SKILLS

Languages: Python, Java, SQL

Frameworks & Libraries: TensorFlow, PyTorch, Scikit-Learn, Flask

Data Science: NumPy, Pandas, Matplotlib

Tools & Databases: PostgreSQL, Git, GitHub
