EDUCATION

Bachelor of Technology in Computer Science with Specialization in Artificial intelligence and Machine Learning | Vellore Institute Of Technology, Bhopal

- August,2023 – May,2027
 - GPA: 8.67
-

PROJECTS

Breast Cancer Prediction and Prevention

- **Full-Stack Engineering:** Developed a secure medical imaging platform using **Flask** and **PostgreSQL**, featuring a dynamic dashboard and a secure platform to upload images.
- **AI Model Optimization:** Implemented and fine-tuned **EfficientNetB3** architectures in **TensorFlow** for high-precision medical image classification.
- **Data Security:** Engineered with a secure authentication system using **SHA-256** hashing to protect sensitive patient records and account password.
- The project is: <https://github.com/AyushSingh331/Breast-Cancer-Prediction-and-Prevention>

Dog Breed Identification

- It is a Deep Learning project build using TensorFlow, Pandas and NumPy.
 - The Dataset was taken from a Kaggle competition: <https://www.kaggle.com/competitions/dog-breed-identification/>
 - The model use was MobileNetv2 for training and testing of data. It can differentiate between the different breeds of dogs and the model was trained on more than 10,000 training images and can differentiate between more than 120 different breeds of dogs.
 - The project is: <https://github.com/AyushSingh331/Dog-Vision>

SKILLS

- | | |
|--------------------|--------------------------------|
| • Machine Learning | • TensorFlow |
| • Python | • PyTorch |
| • Java | • NumPy, Pandas and Matplotlib |
| • SQL | • Scikit-Learn |
